

# Designing Learning Ecosystems: Bringing School Vision to Life Through Compassionate Systems

This one-day workshop invites educators and school leaders to bring their school's vision to life through the **Compassionate Systems Framework**.

Explore how learning design—**beyond curriculum delivery**—can align purpose, pedagogy, relationships, and student agency across the school ecosystem.

## Bringing Vision to Life

Through tools like the **Ladder of Inference** and **Systems Awareness Iceberg**, the workshop supports educators in navigating complexity with clarity and compassion. The day includes hands-on activities, reflection, and peer dialogue, with space to respond to emerging needs. Whether you're working with 3-year-olds to 18-year-olds, leading a team or guiding a classroom, this workshop offers a chance to align practice with purpose—and to begin shaping learning ecosystems that reflect the future you hope to grow.

## Facilitator: Jane Drake

Managing Director of Community Development at the Center for Systems Awareness, Jane Drake works alongside founders Peter Senge and Mette Boell.

With over 30 years in education, she brings deep expertise in systems thinking, capacity building, and compassionate leadership.

Jane has worked globally to embed the Compassionate Systems Framework in schools, drawing on her leadership at the International Baccalaureate where she reimagined global program standards to reflect holistic, developmental approaches.

Jane is committed to helping educators and students engage with complexity in ways that are purposeful, relational, and transformative.

**Monday, 10 November 2025**

**LESNW Regional Office**  
*137 Archer Street, North Adelaide*

**8.30am - 4.30pm**

**\$250 per person**

## Participants will:

- Explore the Compassionate Systems Framework as a tool for aligning school vision with daily practice.
- Engage with systems thinking tools to support clarity and compassion in leadership and learning.
- Reflect on how to nurture agency, purpose, and relational learning across the school ecosystem.
- Begin shaping learning environments that are future-focused and deeply human-centred.
