Deepening Leadership Practice 2.0

Leading for Emergence and Flourishing

Meaningful leadership growth occurs when leaders engage deeply with authentic challenges and opportunities within their own contexts.

Deepening Leadership Practice 2.0 supports leaders to apply Compassionate Systems tools and practices through a project connected to their work and personal leadership growth.

Participants learn alongside colleagues while exploring practical approaches to leading change, navigating complexity and cultivating the conditions for flourishing within their Learning Communities.

Regenerative change is cultivated through collaboration, reflection, flexibility and purposeful action.

In this program, you will:

- develop and implement a leadership inquiry project
- deepen engagement with Compassionate Systems tools and practices
- learn from stories of practice across Learning Communities
- strengthen networks of support, inspiration and collaboration
- build capability for adaptive and regenerative change
- explore how emergence can be nurtured within complex systems
